Education

UTN - University

Bachelor in Software Engineering
No Degree
Mendoza, Argentina

Professional Summary

Skilled Certified Professional Project Manager, with Product Manager and Scrum Master experience for more than 8 years that builds and motivates high-performing teams. Over 15 years of experience in e-commerce and SaaS companies, working with different Methodologies, lifecycles and processes from Web-Development to Manufacturing.

Has coordinated efforts across multidisciplinary teams for large-scale initiatives with high revenue impact by enhancing processes and serving as servant leader. She is skilled in tailoring processes to optimize business impact and customer experience.

Is a fast learner, passionate about technology, hard-worker, self-taught and with soft skills that she has been improving and leveraging based on the necessities of her professional career.

Accomplishments

- Achieved Project and Program Manager Role, supporting more than 120 projects per year with objectives like capacity planning, resources demands and budget forecasts, accounting for ~40M dollars per year. Some of the projects that I achieved successfully are related to:
 - Re-Branding, new consumer features, platform evolution and optimization working with extensive teams, composed of 30+ across the company, with 18 month duration and with ~10M budget.
 - Cost Reduction Initiatives and projects, Cloud cost analysis, effectively reducing AWS and other Vendor's costs by ~25% yearly.
 - Implement Microsoft Excel, PowerBI and Snowflake to develop an inventory tracking system and Information Radiators saving 60% of time consuming in manual reports generation.
 - Resolve product issues through consumer testing and surveys with 95% successful rate.
 - Technical PMO Leadership and development. Collaborating with other project managers from different departments (Marketing, Product, Ops, etc). Implementing processes and ensuring that the projects were aligned with the company goals and vision with 90% successful rate in process and DevOps / Agile implementation over the company by introducing Jira/Asana/MS Project.
 - Resource management, Holidays Season readiness and OKR execution in close coordination with Tech & Business leadership (CEO, CTO, Head of other departments) with 95% successful rate in resource budget, assignment and OKR implementation.
 - Manage Budget, Procurement and Risk Analysis for several projects from ~1K to ~20M.
 - Consolidate multiple sources of documentation/knowledge across the company into Notion for Processes, Technical approaches, Functionalities definitions, and Internal Team Documentation, including Run-books.
 - Implement and Optimize processes for the Operations team, including warehouses and transportation partnerships and integrations.
 - PM of Platform modernization and consolidation, moving towards newer and better supported technologies, standardization and implementation of best practices across all components with 87% successful rate across the company.
 - Adept at stakeholder management, risk mitigation, and quality assurance.
- Results-driven Head of Engineering with extensive experience in Project Management, Agile Methodologies, and Strategic Thinking, with a team of 13 staff members.
- Lead On-call coverage Implementation using Pagerduty for tech teams.
- Proven track record of overseeing complex initiatives, building and managing high-performing engineering teams, root cause analysis, regulatory compliance, research, and implementing effective processes for successful project execution.

Skills

- Leadership and Organizational Development
- Project, Program & Product Management
- Strategic Planning, Development, Tracking & Execution
- Risk, Cost and Procurement Management
- Conflict Management
- Software Development Lifecycle
- Root Cause Analysis
- Cost Reduction and Containment
- Agile, Waterfall and Hybrid Methodologies
- Scrum Master
- Cross-Functional Collaboration
- Processes, Procedures and Regulations Control
- Functional & Business Requirements
- Software Development Lifecycle
- Testing and Conversion Plans
- Quality & Release Management
- Forecasting & Budget Administration
- Data Analysis and Review
- Disaster Recovery Methodologies
- Emotional Intelligence
- Team Productivity Improvement
- Performance Evaluations
- Communications Management
- Analytical Skills
- Attention to Detail
- Storytelling
- Problem Solving
- Systems Design Documentation
- Technical Support

Honors / Positions

- Latinas in Tech - Volunteer Summit 2025
- Groupon Ambassador - 2014 - 2017
- Co-Chair - Groupon for Latinos ERG - 2018 - 2020
- Groupon Bay Area Leader for Volunteers Events: 2018 - 2020

Professional Experience

PanPalz.com

Program Manager and Program Management Office

August 2024 - Present

Freelance

- Lead in the design, development, and implementation of the graphic layout and production communication materials.
- Delegated tasks to the 7 members of the design team and provided counsel on all aspects of the project.
- Supervised the assessment of all graphic materials in order to ensure quality and accuracy of the design.
- Overseen the efficient use of production project budgets ranging from \$2,000 to \$25,000.

PanPalz.com

Project Manager

Jun 2024 – Sep 2024

Freelance

- Helping the world's first nonprofit social media designed to redefine the way we connect through deeply meaningful conversations.
- Work very closely with several teams, helped them achieve the best outcome to achieve great projects for this amazing company!

Farmgirl Flowers

Program Manager and Engineer Manager

Jul 2020 – Jun 2024

Full-time

- Implemented Agile methodologies, enabling improved planning and alignment with OKRs and roadmaps.
- Introduced Atlassian Jira for task tracking, consolidated documentation in Notion, and improved observability with DataDog.
- Managed AWS infrastructure migrations, including Route 53, S3 Buckets, and VPN/VPC implementations.
- Leading multiple initiatives that require deep understanding on how the business operates, how the infrastructure provides solutions for their needs.
- Coordinating and overseeing how to effectively deliver solutions on time from different Engineering areas.
- Serve as a servant leader by facilitating problem-solving, decision-making processes, fostering collaboration, and empowering team members to contribute their expertise and insights, thereby cultivating a supportive and innovative project environment.
- Recruited, placed and oversaw project staff for optimal project results.
- Manage projects schedule, budget and procurement to ensure the right prioritization and timely delivery, cost-effectiveness, and optimal utilization of resources, thereby maximizing project efficiency and achieving organizational objectives.
- Lead Processes decisions and implementations, tailoring them based on the needs of each project.
- Implemented quality control standards for consistent approach and results.
- Oversaw more than 120 projects to support teams, report progress, and influence positive outcomes for key stakeholders.
- Monitored contracts and service level agreements to identify potential risks and implement mitigation actions to protect development process from unforeseen delays and costs.
- Evaluated project requirements to identify and mitigate risks.
- Reviewed contractor proposals to determine favorable partnerships for on-time and under-budget project completion.
- Provide technical guidance, peer review and mentorship to junior engineers engaged in building system designs.
